THIEVES **STEAL** IN **5** MINUTES

PROTECT YOUR UNARMED TRAILER & VALUABLES AGAINST THEFT!

SECURITY SYSTEM

*1000's in service. Not a single successful theft reported.

WHAT WOULD YOU DO IF YOU WERE THE THIEF?

Well, let's begin by saying
your odds aren't lookin' good.

- 1 THE ADJUSTABLE VIBRATION SENSOR**
The slightest amount of movement will set off the adjustable vibration sensor.
- 2 DEAFENING SIRENS & FLASHING LIGHTS**
Will sound if movement is detected by the vibration sensor or any door is opened and the trailer lights will begin to blink. The perpetrator would have to withstand extremely shrill noise throughout the robbery.
- 3 PROTECTION DOESN'T STOP**
Disabling the solar panel simply causes the battery backup to automatically "kick in" thus the protection continues.
- 4 BRAKES AUTOMATICALLY LOCK**
The protected vehicle cannot be moved or towed away because the second the vibration sensor is activated the brakes lock up.

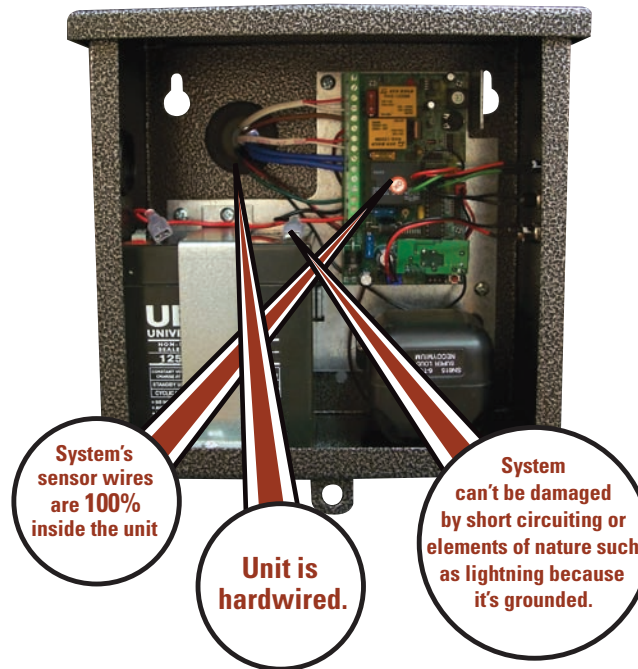

The perpetrator will be forced to endure many obstacles:

- Work to open the door and get inside the vehicle
- Break open the heavy gauge steel box, housing the unit
- Disable the battery
- Disable the solar panel
- Remove 8 tightly twisted screws

No thief has ever OVERCOME such odds.

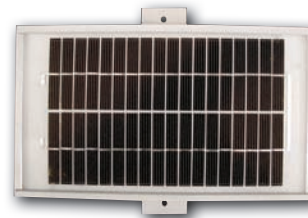

**TG-ELS REMAINS
100% SUCCESSFUL!**

SELF-CONTAINED SOLAR POWERED ALARM SYSTEM

The above security unit, with locking cover plate attached is mounted inside the object being protected (trailer, garage, barn, shed etc.)

The entire system
is solar powered
**NO ELECTRICITY
IS NEEDED**

**SOLAR POWER MEANS NO MAINTENANCE...
NO BATTERIES TO CHANGE**

The system is also equipped with a fully-charged back-up battery that has been tested to last up to 6 days in the event of overcast skies or snow OR in case the solar panel is disconnected in the burglary attempt.

INSTALLATION IS SIMPLE

Everything you need is included. You need only to provide a pair of simple brake wire. By following the detailed and illustrated instructions that are provided, your trailer can be secure in a matter of minutes. The unit houses a 12-volt system that is safe to use in almost any situation.

WHAT DO YOU WANT TO PROTECT?

This multi-purpose alarm can be installed in a barn, shed, garage or trailer... wherever there is something valuable to protect...AND anywhere there is no access to electricity.

NOTE: IF YOU HAVE LIVESTOCK

(including horses) to protect, another system known as HorseGuard is available. On this model, the sirens and lights can be silenced and a two-way pager is used to notify the owner of an attempted break in.

**DEPENDABLE, LONG-LASTING
"PLUG 'N PLAY" SYSTEM**

Is shipped with pre-installed LED indicator and push button for status and charging port, so that the unit's energy level can be easily monitored.

- 12-volt system is safe to use in almost any situation
- A key switch to operate is an option
- If you own multiple units, they can all be keyed alike.
- AC power battery charger and 10' deep cycle charging cable also available

**TrailerGuard -ELS
is the Economical
Alarm of Choice...**

**Chosen by stores, manufacturers, dealers
and individual owners across the country.**
